

METSAN has been manufacturing
in its factory in Istanbul since 1982.

MINI PRODUCT GUIDE 2024

metsanlighting.com

5 YEAR
WARRANTY
★★★★★

Metsan, depending on the brands used, can extend product warranty up to 5 years. For further information please visit our website: www.metsanlighting.com

*Metsan kullandığı markalara göre garanti süresini 5 seneye kadar uzatmaktadır. Detaylı bilgi için ziyaret ediniz: www.metsanlighting.com

*Dream it and really want it.
When you really want it,
it is no longer a dream.*

Sebaattin Kurtulan
Founder

**ARE YOU LOOKING FOR
BETTER LIGHTING?**

With its large product ranges, METSAN offers a wide-ranging assortment of LED luminaries for a broad spectrum of application areas.

 **METSAN**
AYDINLATMA
LIGHTING

1982

Foundation of Metsan

Origins of Metsan relies on mould production. It is the mould technology and knowledge we have that enables us today a wide range of products and fast prototype manufacture.

First rule to exist long years in lighting industry is to dominate the mould.

We began producing mould in a 50m2 workshop in 1982. The turning machine that we made our first moulds at is now resting in the factory.

1990

First Export Products

Russia turned into a grand market as a result of the collapse of the Eastern Bloc. Turkey has become a major industrial production line with regard to both geographical proximity and production capacity. Meanwhile, Metsan carried out the very first exportation to Russia.

By means of export, Metsan obtained not only a producer identity, but also an identity of an exporter.

Production aimed at exportation revealed considerable progress in product range and quality improvements.

1995

New Factory

Increased capacity and high demand of exporting locations required new plant enterprise. During this year, Metsan activated a new factory occupying 3000 m2 closed space in Kağıthane. Romania, Ukraine, Bulgaria joined to the exported countries.

With the raise in the number of exported countries product certification procedure launched.

Together with the new plant the manufacturing process involved a structure divided into departments.

2002

Moving to Hadimkoy Factory

The brisk in African market fostered Metsan to enhance its production capacity once more. Metsan founded a new production facility in Hadımköy due to scarce volume. A novel period has begun in exportation to Africa and Turkic Republics market via the production at 15000m2 closed space.

The raise in production capacity brought about capability of supplyment in high quantities and it outshone all the others.

With the foundation of new factory in Hadımköy Metsan took the first step in institutionalisation in terms of administration

2009

New Investment for LED Products

Led technology in lighting products commenced to spread towards the end of 2000s. Metsan followingly took action to manufacture first led product range. For leds Metsan made an agreement with worldwide leader Nichia comprising supplyent and technology support. And it put Led Downlight Series on with Nichia assurance.

To become adapted to new technologies is mandatory for a competitive industrial structure.

Metsan 2000 together with Led Series turned into a structure coming up with an alternative product set.

2014

New Investment for Technology Machines

Technological improvements were achieved with investments for new machinery. The range of products was broadened and quality enhanced with the purchase of CNC, Aluminum and Zamak Injection machinery.

European countries were added to our export locations; Europe's major hotels and shopping plazas were illuminated with Metsan products.

1987

First Lighting Product

Metsan which has been manufacturing moulds for leading actors in the sector made a strategic business decision in 1987 and took the first step in lighting industry with initial 12x50 Pluton Series. There was an increasing demand for halogen spots in pluton style. Hence entering into the sector by this group was the most convenient option.

We brought halogen products out which attained high demand owing to our broad knowledge and ingenuity.

Metsan succeeded in composing Pluton product group and consequently gave up manufacturing mould for the market and began to exploit the mould room merely to develop its own products.

1991

Product Line Expansion

The synchrony in accordance to the export compelled a raise in capacity. During this period, Metsan invested in its initial factory in Çağlayan. Product range advanced subsequently and various product groups emerged according to the needs of lighting industry.

With the raise in the number of exported countries product certification procedure launched.

Metsan was capable of conducting mass production of products more than a hundred by the help of enhanced product range.

1998

Machinery Capabilites Improved

To keep pace with new progress in technology is vital in order to keep our products up to date. With this in mind, Metsan furnished the equipment pool with the latest automation systems. Through this turn the capacity boosted 200% and the performance as well.

In order to supply product for diverse markets recent production technologies should be employed.

Assembly lines rested upon technology and integrated with qualified human resource strengthened the perception of quality within the sector.

2005

Construction Companies are Growing

A decade ago the construction industry progressed substantially particularly in Turkey. There was an intense demand for Metsan products which have high quality-price ratio both in private sector and public projects.

The evolution of lighting industry is larglely in direct proportion to construction industry.

First R&D unit is set up for quality standards which meet various product expectations of domestic and foreign market.

2012

Metsan Started for Changing Corporate Identity

As the brand familiarity ascended, practices began to redesign the corporate identity. It was a turning point for Metsan on the way to branding.

Investing in the brand enhances the quality perception among the other players and builds mutual trust.

Today, Metsan proceeds rapidly with its 170 employees on a 15000 m2 closed space by a product range over 3500 exported to 30 countries.

2023 >

Modernized LED Products and Sales Strategy

We set our targets correctly. We have extended our warranty from 5 to 6 years. We have added at least 300 new products to our range of products to create new alternatives to the lighting sector. Our newly added high quality products that we will produce will enlighten housing, shopping center, hotel and hospital projects with Metsan products.

HISTORY

Raw Material Process

We prefer best raw materials in our products.

Our raw material is formed of firstclass metal and aluminium. High quality material helps us to minimize returns, possible defects and technical service necessities. The raw material is recyclable, eco-friendly and harmless.

Mould Room

We can adjust to various product types rapidly via thousands of mould stocks.

We design all lighting products in our own mould room. We can generate hundreds of different moulds in a very short time to achieve functional details and aesthetic solutions by hightech machines and counters.

Paint Shop

We have the necessary equipment to perform electrostatic and powder coated painting.

Powder coating is a type of coating that is applied as a free-flowing, dry powder. The main difference between a conventional liquid paint and a powder coating is that the powder coating does not require a solvent to keep the binder and filler parts in a liquid suspension form.

Led Assembly Line

Led Components assembled on the card through automation

Custom design electronic circuits and led components are applied high intensed aluminium powered card.

Assembly Lines

Components are mounted on several assembly lines by considering each distinct product type.

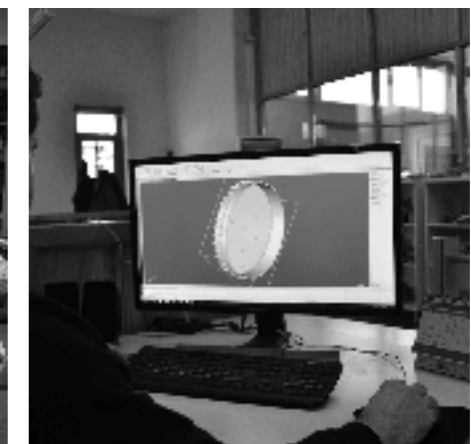

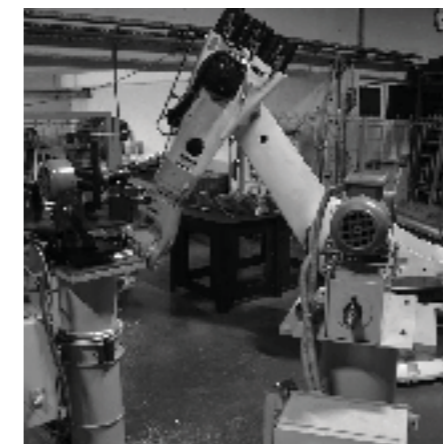

Different parts of the product body is assembled through work stations connected to each other on assembly line. Hence, final product is developed. Various products or variations of same product are constructed in seperate batches with respect to priority relations of technology.

Quality Control

The products which are ready for packaging are inspected by quality control.

Our lighting products which can get in every room easily are a result of the system we built in our factory. We are aware of the direct relationship between the product and the system. Therefore, we believe that taking over system parameters allows us to examine the properties of the product.

ECOLOGY X METSAN

Ecological Solutions Enlightening Nature

As Metsan Lighting, we take it as a mission to protect nature and support a sustainable future. We prioritize our environmental awareness and ecological approach in the lighting sector.

1. Ecological Products: We use environmentally friendly materials and energy efficiency-oriented technologies in our lighting solutions. While protecting the environment with energy-saving LED lighting products, we also act in accordance with the principle of sustainability with long-lasting and recyclable materials.

2. Eco-Friendly Production: Aluminum production is carried out with clean production techniques that minimize its impact on the environment. In this way, we reduce our carbon footprint while protecting natural resources. 85% of our products that we market are aluminum material. While aluminum products dissolve in nature for 50 to 100 years, it takes 500 years for plastic materials to dissolve in the natural environment.

The use of plastic creates environmental pollution while consuming natural resources. Therefore, limiting the use of plastic is important for future generations to live in a healthy environment.

As Metsan Lighting, we aim to both meet your lighting needs in the best way and protect nature. Step into a brighter and more sustainable future with our company that supports ecology in the lighting industry!"

Doğayı Aydınlatan Ekolojik Çözümler

Metsan Aydınlatma olarak, doğayı korumayı ve sürdürülebilir bir geleceği desteklemeyi misyon ediniyoruz. Aydınlatma sektöründe çevreye duyarlılığımızı ve ekolojik yaklaşımımızı ön planda tutuyoruz.

1. Ekolojik Ürünler: Aydınlatma çözümlerimizde, çevreye dost malzemeler ve enerji verimliliği odaklı teknolojiler kullanıyoruz. Hem enerji tasarrufu sağlayan LED aydınlatma ürünleriyle çevreyi korurken, hem de uzun ömürlü ve geri dönüştürülebilir malzemelerle sürdürülebilirlik ilkesine uygun hareket ediyoruz.

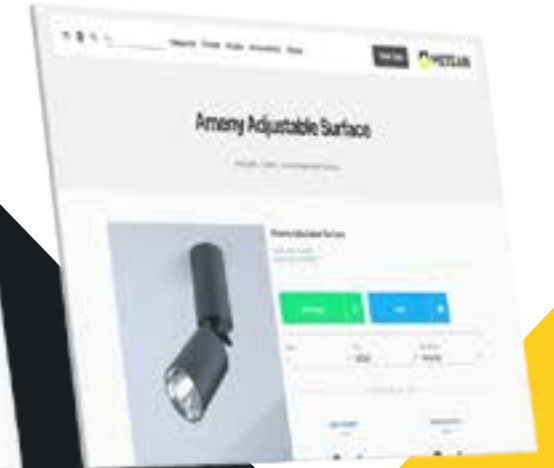

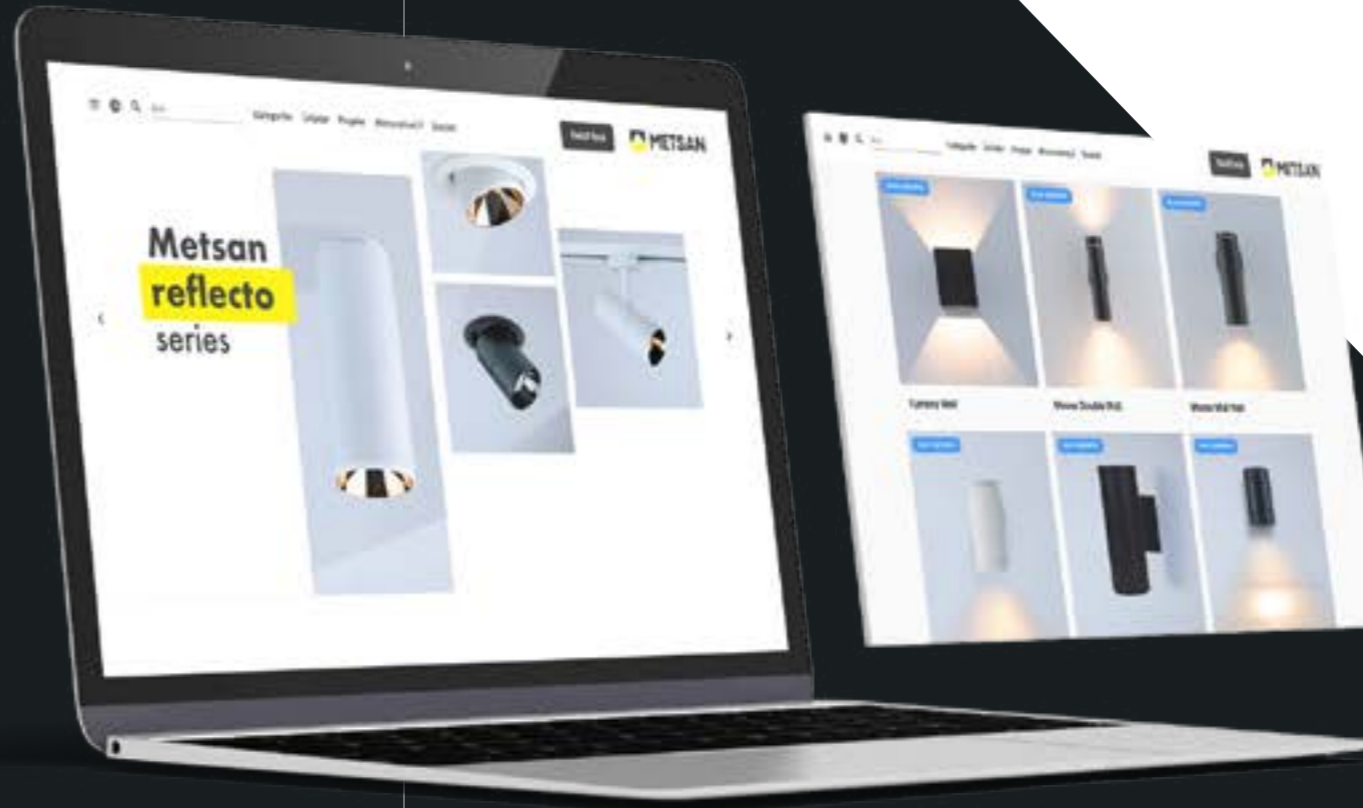

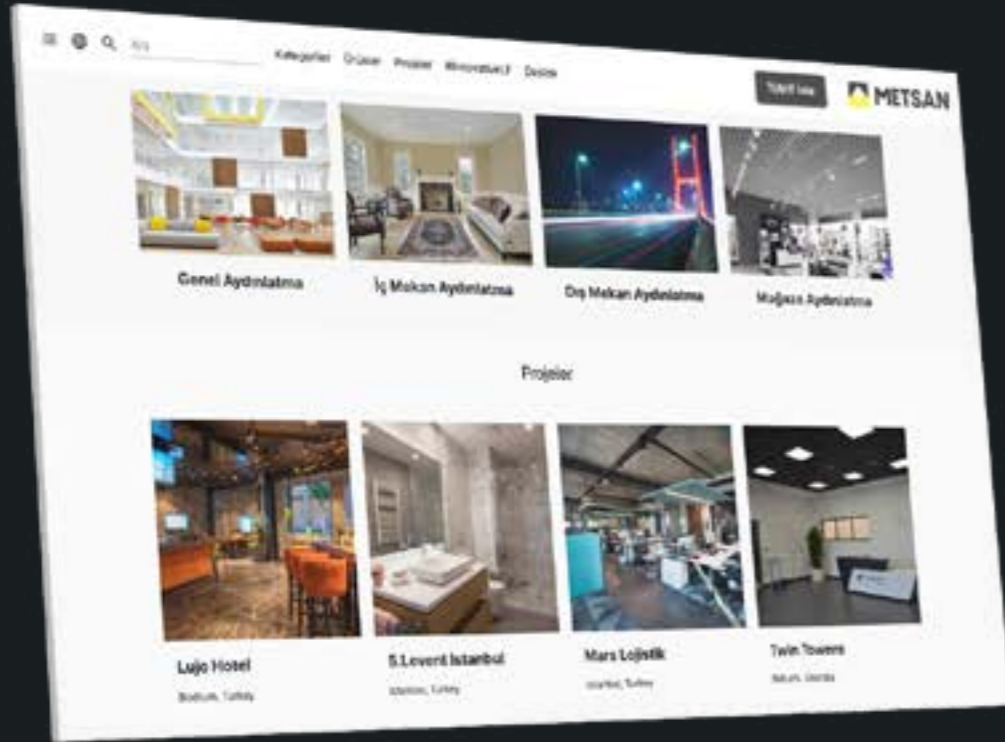

2. Doğa Dostu Üretim: Alüminyum üretimi, çevreye olan etkisini minimize eden temiz üretim teknikleriyle gerçekleştirilir. Bu sayede doğal kaynakları korurken, karbon ayak izini azaltırız. Ürünlerimizin %85'i alüminyum malzemeden imalat edilmiştir. Alüminyum ürünler doğada 50 ila 100 sene arasında çözünürken plastik malzemelerin doğal ortamda çözünmesi 500 seneyi bulur.

Plastik kullanımı, doğal kaynakları tüketirken çevre kirliliği yaratır. Bu nedenle plastik kullanımının sınırlandırılması, gelecek nesillerin sağlıklı bir çevrede yaşaması için önemlidir.

Metsan Aydınlatma olarak, hem aydınlatma ihtiyaçlarınızı en iyi şekilde karşılamayı hem de doğayı korumayı hedefliyoruz. Aydınlatma sektöründe ekolojiyi destekleyen firmamızla birlikte, daha aydınlık ve sürdürülebilir bir geleceğe adım atın!"

METSAN

It's been 41 years since our founder Sebahattin Kurtulan has built the moulding workshop he once imagined. From that day on, Metsan Lighting which has been built on an expert-apprentice relationship, continues to deliver the most masterly assistance to its customers.

This guide will help you to find out the right way in the dark.
Follow the light.

Kurucumuz Sebahattin Kurtulan'ın hayal ettiği kalıphaneyi kuralı tam 41 sene oldu. O günden bugüne, usta-çırak ilişkisi üzerine kurulmuş Metsan Aydınlatma müşterilerine en ustaca desteği vermeye devam ediyor...

Bu rehber karanlıkta doğru yolu bulmanıza yardımcı olacaktır.

#Innovative lighting factory.

Metsan Lighting offers you its service as a master with its elite and top quality lighting products in all areas of life.

The whole story is started with the production of a spotlight frame in 1982. Our team, which keeps the same passion in each new model, offers you expert service with lighting products and aesthetic models that can be used in all areas

We discuss for the best every day, until we can do better. We continue to do the best with our Innovative Lighting Factory motto.

With our more than 600 models and unlimited customization options, we offer our tailor made service in indoor and outdoor lighting fixtures. lighting products and aesthetic models that can be used in all areas.

Have you ever thought about light and its other features? In Metsan Lighting, light is not only illuminating tool but it is also an equipment for pleasure, comfort, and luxury. We can't mention Metsan's products without mentioning at least one of these three features. Because Metsan is aware of the optical criteria needed to comfort light, it provides light with CRI values >85 to ensure no discomfort for its customers.

People may believe that light does not affect psychology, but we at Metsan Lighting know that the light used has significant impact on the emotions. So, if you want to feel warmth a light with a CCT of 3300K, this is the best option. a light with a CCT> 5300k would give you the feel of refreshment and energy. You can also review Metsan's line products that provide daylight color temperature. Metsan would be your first, final and only destination if you are looking for perfect shapes, ease of installation, and perfect lighting.

The remarkable touches

RECESSED SPOT CASE

The product prime (PRIME) category provides the product types between a top quality and qualified performance.

- * Prime series provides spot cases particularly suitable for Gu10 - Gu5.3 bulb for indoor and outdoor.
- * Provides the best compromise between an attractive price and qualified housing quality.
- * Focus on high quality material.
- * Excellent finishes and product design.
- * Many body - case - reflector color options.

Typical Applications :

- Houses and offices applications.
- Architectural applications.
- General lighting applications.
- Retail store applications.

Metsan surface mounted series provides the best efficiency with its high lumen output and different power options. We provides different frame models for many requirements.

- Focus on efficacy and quality with Metsan proven patented heatsinks.
- Normal life-time up to 50,000 h (L70/B50)
- Adjustable heights for requirements.
- Convertible to pendant model.
- Installation friendly and flexible for all series. • IP 54 and IP 65 model options.
- For luminaries of protection class III.

Typical Applications :

- Retail and Hospitality applications.
- Store and Market applications.
- Office and education applications.

RECESSED SPOT LIGHTS

Metsan spot light series provides the best efficiency with its high lumen output and different power options. We provides different frame models for many requirements.

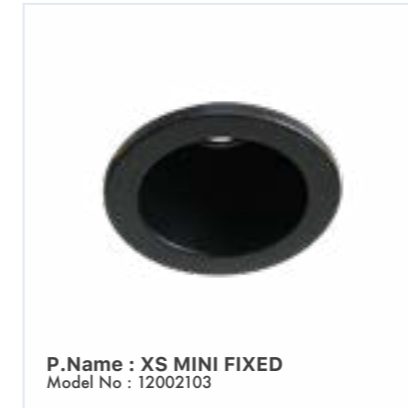

- Focus on efficacy and quality with Metsan proven patented design frame and heatsinks.
- Aesthetic models for different design studies.
- High CRI options.
- Beam options.
- IP 54 and IP 65 model availabilities.
- Normal life-time up to 50,000 h (L70/B50)
- Different cutting size range to cover all applications and requirements.
- Installation friendly and flexible for all series.
- For luminaries of protection class III.

Typical Applications :

- Retail and Hospitality applications.
- Store and Market applications.
- Office and education applications.
- Architectural applications.

SURFACE MOUNED SPOT LIGHTS

Metsan surface mounted series provides the best efficiency with its high lumen output and different power options. We provides different frame models for many requirements.

- Focus on efficacy and quality with Metsan proven patented heatsinks.
- Normal life-time up to 50,000 h (L70/B50)
- Adjustable heights for requirements.
- Convertible to pendant model.
- Installation friendly and flexible for all series.
- IP 54 and IP 65 model options.
- For luminaries of protection class III.

Typical Applications :

- Retail and Hospitality applications.
- Store and Market applications.
- Office and education applications.

LINEAR LIGHTS

Metsan linear series provides the best efficiency with its high lumen output and different power options. We provides different application models for many requirements.

- Focus on efficacy and quality with Metsan proven aluminium extrusion models.
- Normal life-time up to 50,000 h (L70/B50)
- Adjustable lengths for requirements.
- Convertible to pendant model.
- Installation friendly and flexible for all series.
- IP 54 upgrade option.
- Low ugr <18 optic option
- For luminaries of protection class III.

Typical Applications :

- Retail and Hospitality applications.
- Store and Market applications.
- Office and education applications.
- Hospital applications.

WALL LIGHT

Metsan wall mounted series provides the best efficiency with its high lumen output and different power options. We provides different frame models for many requirements.

- Focus on efficacy and quality with Metsan proven patented heatsinks.
- Normal life-time up to 50,000 h (L70/B50)
- Adjustable heights for requirements.
- Installation friendly and flexible for all series.
- IP 54 and IP 65 model options.
- For luminaires of protection class III.

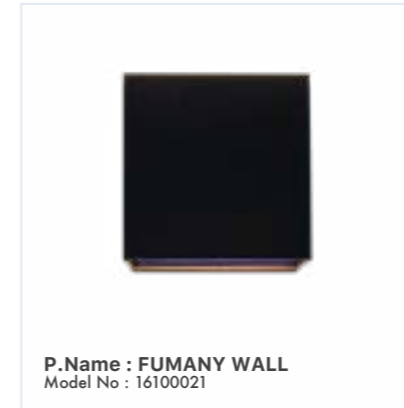

Typical Applications :

- Retail and Hospitality applications.
- Store and Market applications.
- Office and education applications.
- Hospital applications.

CCT TUNABLE

www.ccttunable.com

The **POWER** of **VERSATILITY**

Metsan surface mounted series provides the best efficiency with its high lumen output and different power options.

We provides different frame models for many requirements.

- Focus on versatility in 1 product with Metsan proven qualified cases .
- Normal life-time up to 50,000 h (L70/B50)
- Switchable color temperature and power on the driver. .
- High CRI. (>90)
- Installation friendly and flexible for all series.
- IP 54 and IP 65 model options.
- For luminaries of protection class III.

Typical Sales Channales :

- Chain Stores.
- Electrical Shops.
- Construction Markets.
- Lighting Shops.
