1982

Foundation of Metsan

Origins of Metsan relies on mould production. It is the mould technology and knowledge we have that enables us today a wide range of products and fast prototype manufacture.

First rule to exist long years in lighting industry is to dominate the mould.

We began producing mould in a 50m² workshop in 1982. The turning machine that we made our first moulds at is now resting in the factory.

1990

First Export Products

Russia turned into a grand market as a result of the collapse of the Eastern Bloc.

Turkey has become a major industrial production line with regard to both geographical proximity and production capacity. Meanwhile, Metsan carried out the very first exportation to Russia.

By means of export, Metsan obtained not only a producer identity, but also an identity of an exporter.

2009

New Investment for LED Products

Led technology in lighting products commenced to spread towards the end of 2000s. Metsan followingly took action to manufacture first led product range. For leds Metsan made an agreement with worldwide leader Nichia comprising supplyment and technology support. And it put Led Downlight Series on with Nichia assurance.

To become adapted to new technologies is mandatory for a competitive industrial structure.

1987

First Lighting Product

Metsan which has been manufacturing moulds for leading actors in the sector made a strategic business decision in 1987 and took the first step in lighting industry with initial 12x50 Pluton Series. There was an increasing demand for halogen spots in pluton style. Hence entering into the sector by this group was the most convenient option.

We brought halogen products out which attained high demand owing to our broad knowledge and ingenuity.

2002

Moving to Hadimkoy Factory

The brisk in African market fostered Metsan to enhance its production capacity once more. Metsan founded a new production facility in Hadimköy due to scarce volume. A novel period has begun in exportation to Africa and Turkic Republics market via the production at 15000m² closed space.

The raise in production capacity brought about capability of supplyment in high quantities and it outshone all the others.

TODAY

Modernized LED Products and Sales Strategy

We have added new 5000m² place to our existing factory which is located in Istanbul. We have been growing up with our values and our passions. If you have been looking for professional lighting center, then welcome to our team.
